

For a 4th year in a row, Aspirus has been recognized as one of the top Health Systems in the United States by IBM Watson in their annual study identifying the top-performing health systems in the country based on overall organizational performance.

## **SIGN ON BONUS – Up to \$10,000**

We are seeking a RESPIRATORY THERAPIST in various Aspirus Hospital locations who provides respiratory and cardiopulmonary monitoring, diagnostics and therapy services under medical direction to patients in a variety of care environments. Assists in orientation training of hospital staff, students and the public regarding respiratory disease and care. Provides respiratory care to patients of all ages, including neonates, pediatric, adolescent, adult and geriatric patients. Interprets patient information and understands treatment needs depending on the age of patients under care. Whenever applicable, demonstrates understanding of the needs of specific age groups in terms of their physical and motor development, psychosocial development and intellectual/language development.

*“Aspirus Wausau Hospital Respiratory Therapists practice at the top of their license. We have a strong Assess and Treat and Ventilator management protocols, along with advanced practices such as Arterial Line placement and Intubation. We have Adult Medical and Cardiac ICUs and a Neonatal ICU. Our therapists are a part of our NICU transport team and support a busy Trauma Certified Emergency Department. We have a clinical ladder for those who qualify after 2 years of joining our team. We are a growing department and welcome new team members.”*

### PROFESSIONAL EXPERIENCE/QUALIFICATIONS

- Knowledge of respiratory care standards and protocols normally acquired through graduation from an AMA approved school of Respiratory Care with an Associate Degree.

Aspirus Wausau Hospital is the flagship of the Aspirus system that serves patients in 14 counties across northern and central Wisconsin, as well as the Upper Peninsula of Michigan. It is a licensed private/not-for-profit facility with 325 beds and staffed by 350 physicians in 35 specialties. Aspirus Wausau Hospital is a Level II trauma center that provides primary, secondary and tertiary care services as a regional referral center. Specialty referral service emphasis exists in cardiology and cardiothoracic surgery, orthopedics and cancer. The hospital has an average daily inpatient census of 220 with approximately 15,000 admissions per year. Outpatient visits exceed 50,000 and there are also more than 24,000 annual emergency department visits.

As an Aspirus team, we demonstrate caring, we plan to impact the future, work with happiness and enthusiasm, recognize our power to make a difference and improve the health of our communities.
